

SHOWA 708

The 708 ambidextrous gloves utilize unflocked material to prevent the risk of food contamination. However, this doesn't mean compromising on grip and dexterity. By using fish scale grip inside and outside the glove, the 708 provides superior control when working with liquids and during long periods of use. Additionally, the chemical-resistant compound makes these gloves suitable for use in laboratories and preventing exposure to harmful chemicals.

BENEFITS

- Latex-free
- Flexible
- Increased dexterity
- Extra Grip
- Strong
- Chemical-resistant
- Disposable

FEATURES

- Beaded cuff
- Strong chemical resistance
- Unflocked
- **Ambidextrous**
- Fish scale grip inside and out
- Powder-free
