

SHOWA 891

Forged with fluoroelastomer rubber, the SHOWA 891 chemical and acid resistant glove provides superior hand and forearm protection against highly corrosive acids. The butyl rubber coating is designed for handling aliphatic and aromatic hydrocarbons, such as Benzene, Toulene, and Xylene. Smooth surface grip allows for increased sensitivity and tactility when handling small components.

BENEFITS

- Acid-resistant
- Hydrocarbon-resistant
- Impermeable
- Forearm protection

INDUSTRIES

USER INSTRUCTIONS

Gloves provide protection from chemical and mechanical hazards shown. Do not use gloves that show signs of wear. If required, cleanse outer surface of glove with running water. Discard used gloves in compliance with local regulations. Do not wear gloves when there is a risk of entanglement by moving parts of machines.

DISCLAIMER

The descriptions, characteristics, applications and photos are given for information purposes and do not constitute a contractual commitment. The manufacturer reserves the right to make any modifications it deems necessary.
